SUMMARY

Software Engineer at **Citibank** with experience building and maintaining backend services, REST APIs, PL/SQL data pipelines, automation tools, and enterprise applications. Strong in **Java, Spring Boot, Python, SQL/PLSQL, JavaScript, and TypeScript**, with experience in **microservices, automated testing, CI/CD, database optimization, and production support**. Experienced in modernizing batch-based systems toward **REST APIs and event-driven architectures**.

EDUCATION

Veermata Jijabai Technological Institute (VJTI)
B.Tech. in Information Technology (CPI: 8.17/10)

2020 – 2024

WORK EXPERIENCE

System Analyst | Citibank

July 2024 – Present

- Developed and maintained enterprise applications using **Java, Spring Boot, Oracle SQL/PLSQL, REST APIs, and Tomcat** across financial crime screening, vendor management, and travel & expense platforms.
- Delivered **4,000+ lines of JUnit/Mockito tests** across **26 Java repositories**, increasing unit test coverage from **0–5% to 80%+**; resolved **1,500+ SonarQube** bugs, vulnerabilities, and security hotspots.
- Built a **Python CLI automation tool** integrated with **Gemini APIs** to generate remediation suggestions for SonarQube issues, reducing repetitive manual code-fixing effort.
- Optimized **PL/SQL procedures and batch processing pipelines** using caching and batch-processing strategies, reducing execution time from approximately **5 hours to 2.5 hours** and improving processing efficiency by up to **75%** across critical workflows.
- Developed and optimized integrations and data workflows involving **SFTP, NDM, AutoSys, PL/SQL ETL**, and enterprise applications; created and maintained scheduled jobs for upstream and downstream processing.
- Contributed to application modernization by developing **RESTful services** and evaluating **event-driven architecture** to replace traditional feed-based integrations; authored technical design and implementation documentation.
- Collaborated with Product Owners, Scrum Masters, Business Analysts, and development teams in **Agile/Scrum**; participated in code reviews, CI/CD, automated deployments, SIT/UAT, production support, and defect resolution using **Red Hat OpenShift**.

Summer Analyst Intern | Citibank

May 2023 – July 2023

- Built a full-stack internal platform using **Angular, TypeScript, Node.js, Express, and Oracle SQL** to automate ingestion of **millions of records** through optimized data pipelines and CLOB handling.
- Developed frontend modules, backend REST APIs, and validation workflows to improve enterprise data ingestion while maintaining **data integrity and consistency**.
- Received a **Pre-Placement Offer (PPO)** and converted the internship into a full-time Software Engineering role.

PROJECTS

Ur Typing Friend | *React.js, SCSS, JavaScript*

July 2022

- Built a web application that measures **typing speed (WPM)** and **accuracy** using real-time keystroke analysis; implemented dynamic components and routing with React Router.

Stock Market Trend Prediction | *Python, TensorFlow, Keras, Pandas, Streamlit*

April 2023

- Developed an ML model using **LSTM and SVM** on historical stock data and moving averages, achieving approximately **65% prediction accuracy** on test datasets.

TECHNICAL SKILLS

Languages: Java, Python, SQL, PL/SQL, JavaScript, TypeScript, C++

Backend: Spring Boot, Node.js, Express, REST APIs, Microservices

Frontend: React.js, Angular, Next.js, SCSS, Tailwind CSS

Databases: Oracle, MySQL, MongoDB

Tools & DevOps: Git, Linux, Docker, OpenShift, CI/CD, AutoSys, SFTP/NDM, SonarQube, Postman, JUnit, Mockito

AI Tools: Gemini APIs, GitHub Copilot

LEADERSHIP & ACHIEVEMENT

Google Developer Student Clubs, VJTI | *Media and Outreach Lead*

August 2022-May 2023

- Responsible for conducting workshops on development for juniors and coordinating with other colleges

Enactus, VJTI | *Vice President*

September 2022-May 2023

- Led club to achieve entrepreneurial solutions for societal issues and worked on Project Eklayva

CodeChef Long Challenge

July 2022

- **Secured 3rd rank globally** in the CodeChef Long Challenge.
